

NETWORKING & SYSTEM ADMINISTRATION LAB**Experiment No.: 1****Aim**

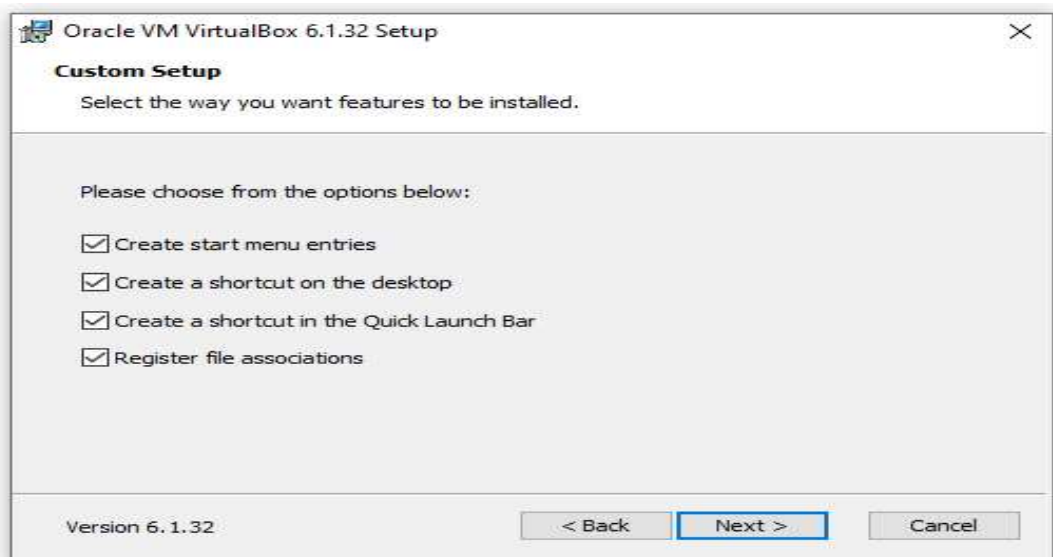

Install the latest version of Ubuntu on an Oracle VM VirtualBox.

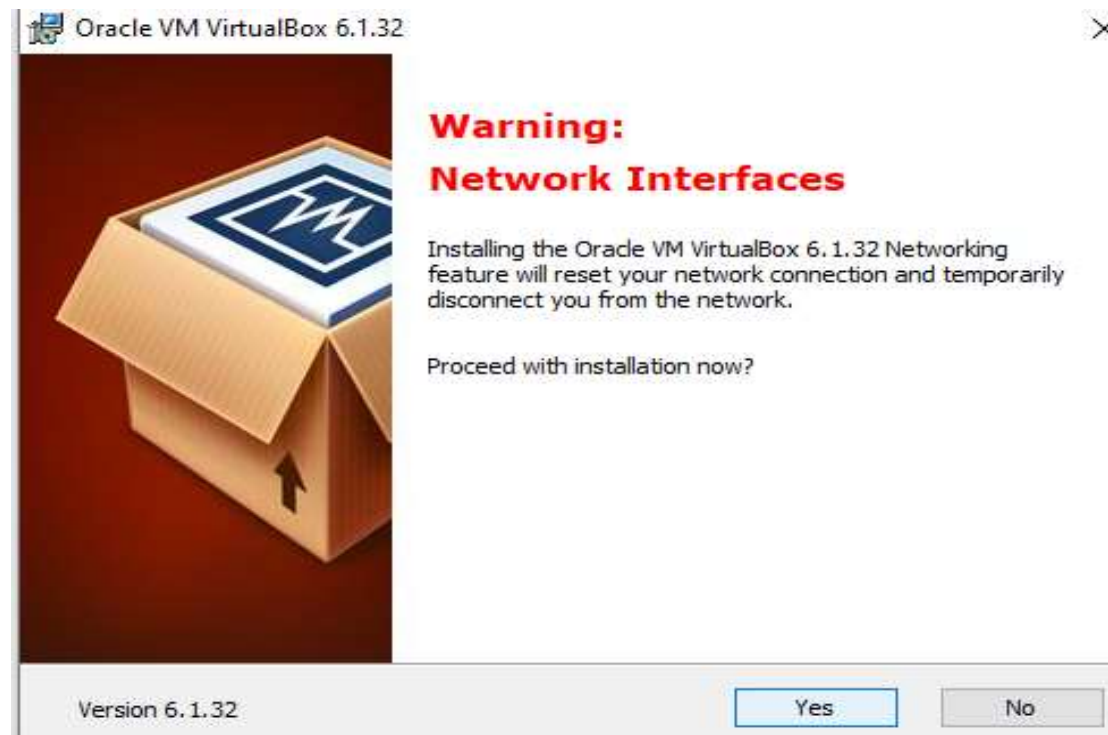

Procedure

Step 1: setup wizard to the click next to continue

Step2: select the features to be installed

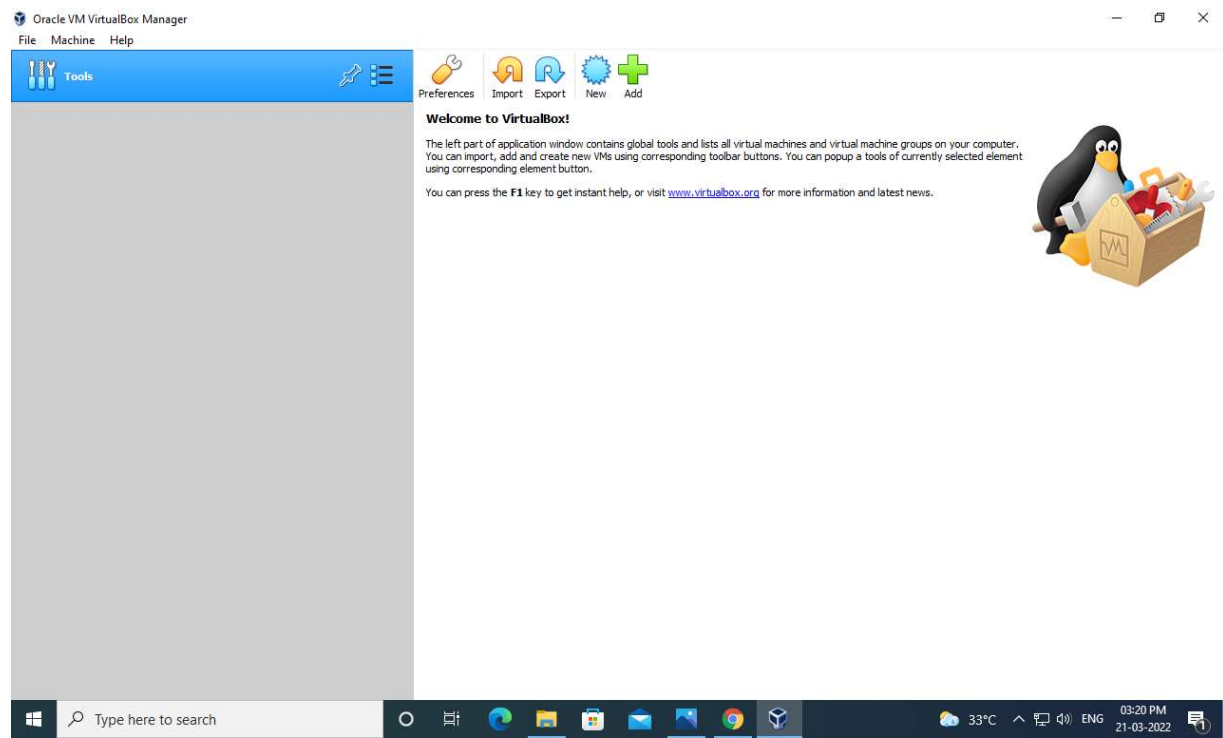

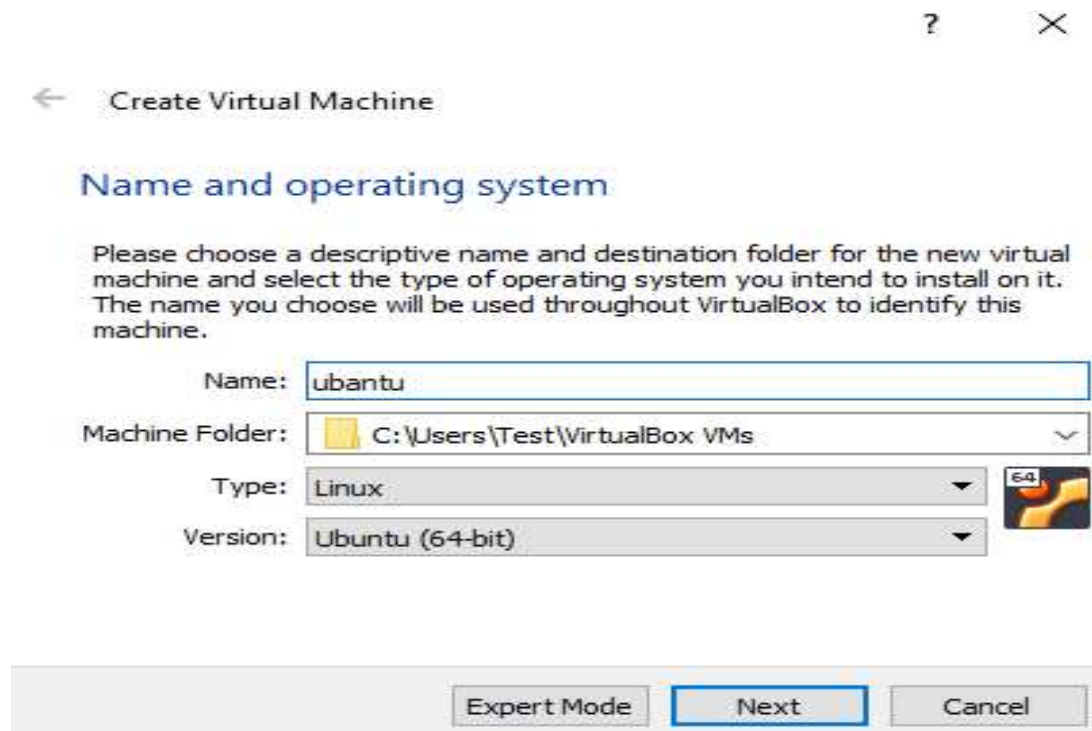

Click there to installation complete

Select the name of the operating system

? ×

← Create Virtual Machine

Memory size

Select the amount of memory (RAM) in megabytes to be allocated to the virtual machine.

The recommended memory size is **1024** MB.

 Create Virtual Machine

Hard disk

If you wish you can add a virtual hard disk to the new machine. You can either create a new hard disk file or select one from the list or from another location using the folder icon.

If you need a more complex storage set-up you can skip this step and make the changes to the machine settings once the machine is created.

The recommended size of the hard disk is **10.00 GB**.

☐ Do not add a virtual hard disk

☒ Create a virtual hard disk now

☐ Use an existing virtual hard disk file

← Create Virtual Hard Disk

Storage on physical hard disk

Please choose whether the new virtual hard disk file should grow as it is used (dynamically allocated) or if it should be created at its maximum size (fixed size).

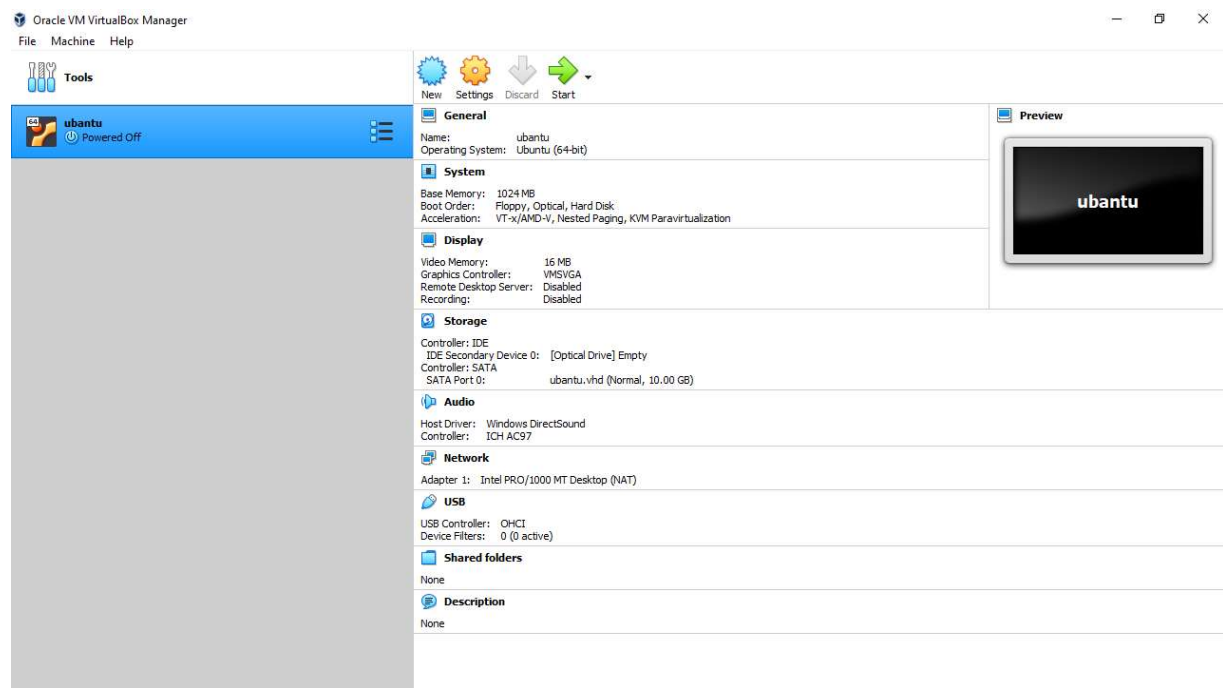

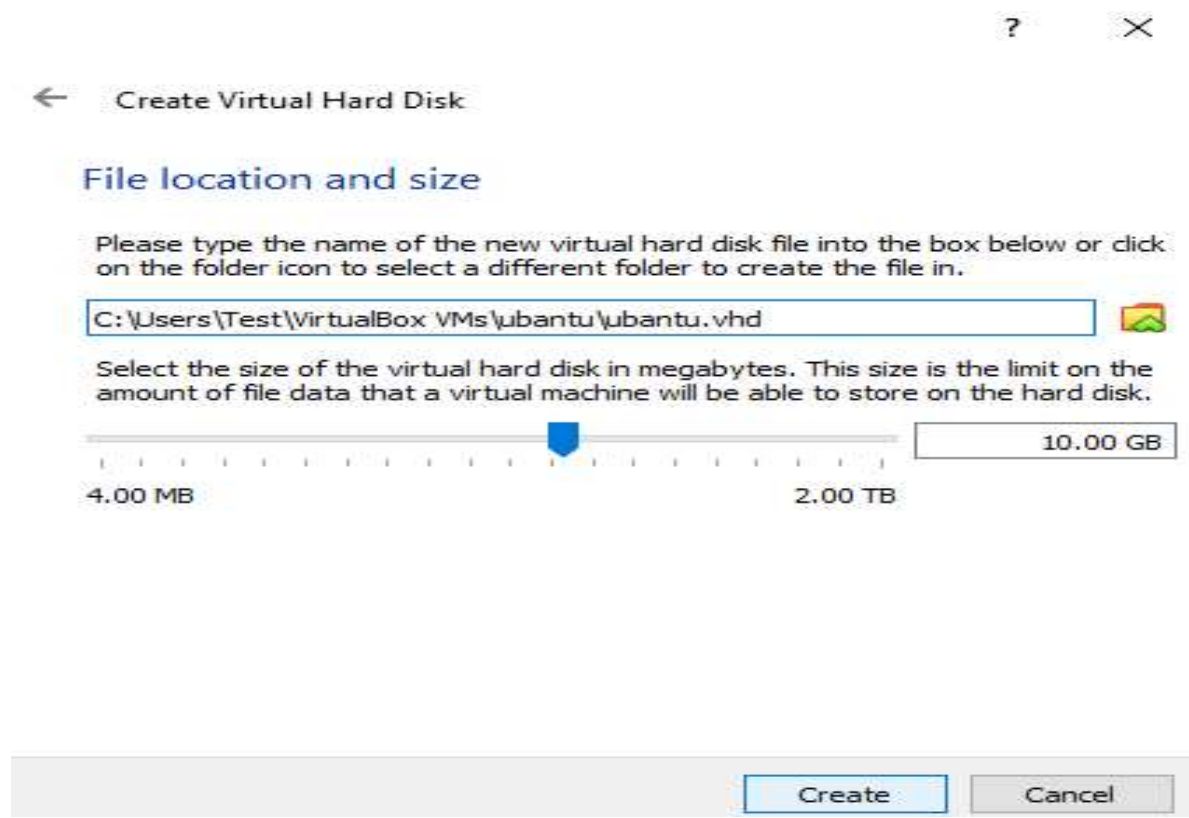

A **dynamically allocated** hard disk file will only use space on your physical hard disk as it fills up (up to a maximum **fixed size**), although it will not shrink again automatically when space on it is freed.

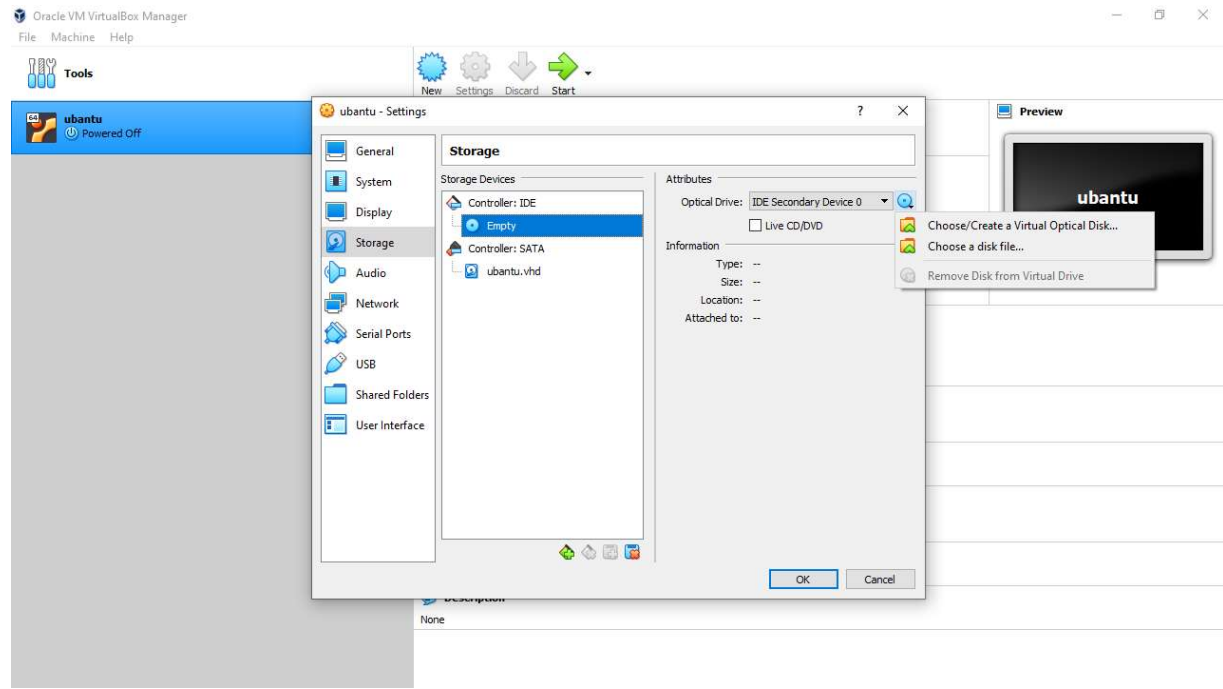

A **fixed size** hard disk file may take longer to create on some systems but is often faster to use.

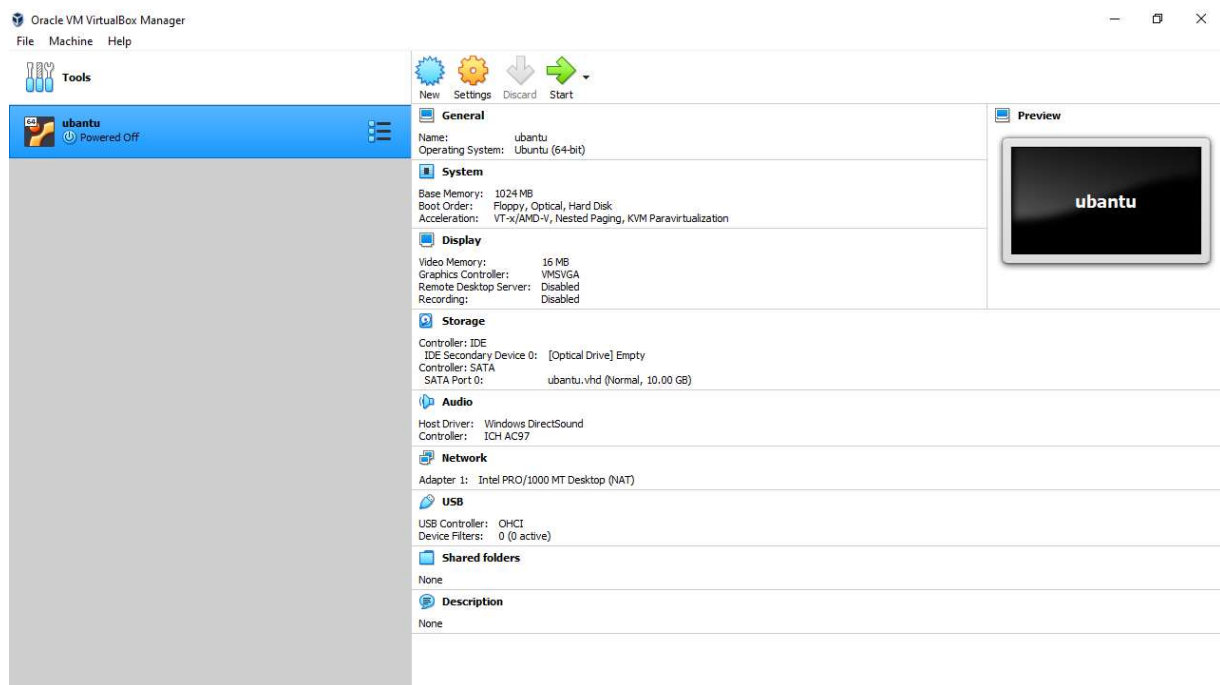

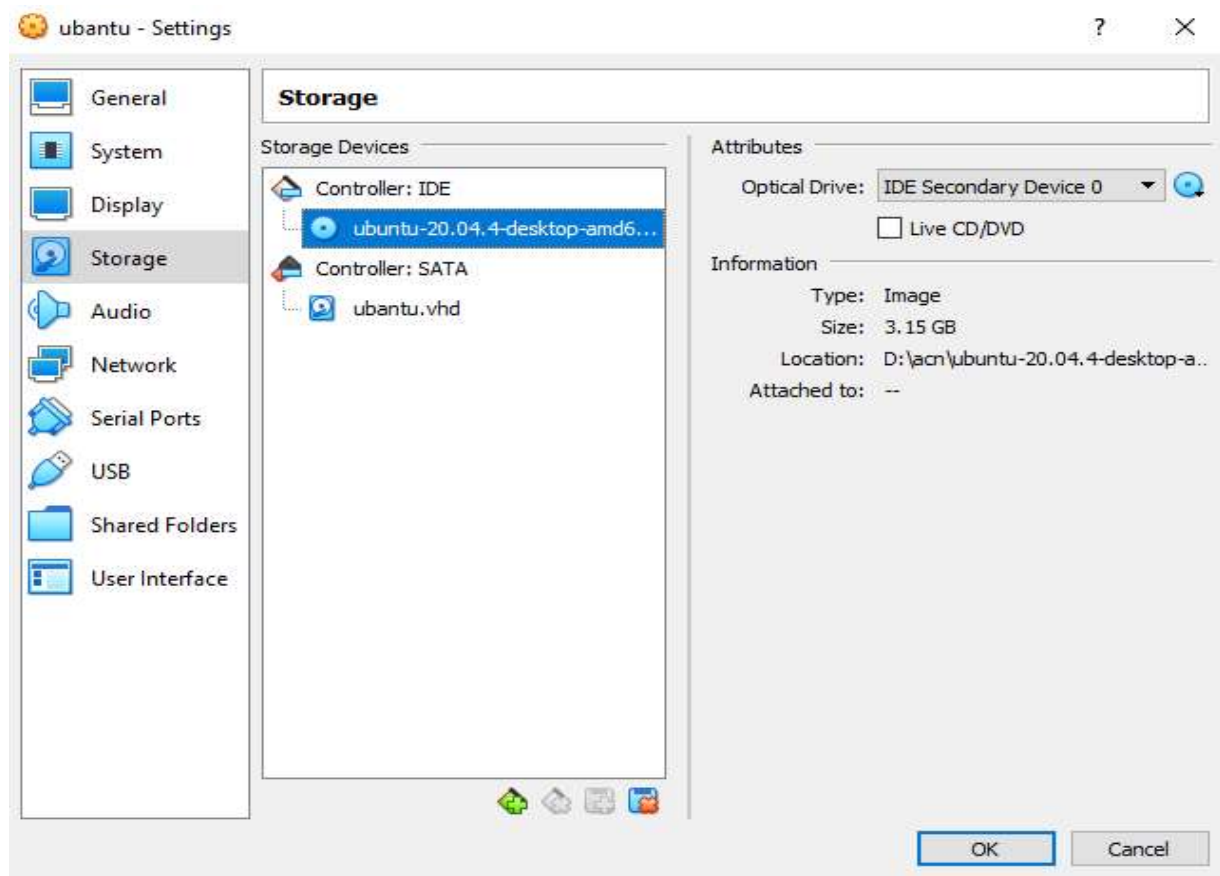

☒ Dynamically allocated

☐ Fixed size
